

GDS environmentally friendly and safe drilling fluids & lubricants *from Matex*

FOAMER

- The biodegradable foaming agent, Foamer, is an environmentally safe product for use within, e. g., geoenery/well drilling and for foundation drilling
- The foaming agent gives a tight foam with good lifting characteristics
- Good foaming characteristics already at low mixing rate from 0.5%
- The foaming agent does not wash out existing lubricating oil film from the hammer or the drill rods
- The foaming agent has a biodegradation percentage of 99.9% after 2 to 3 days
